

BioTRANSformation of by-products from fruit and vegetable processing industry into valuable BIOproducts

Miguel Angel Cubero

Miguel Angel Cubero, R+D Manager of Indulleida, was formed as an analytical chemist and a chemical engineer at Instituto Quimico de Sarria (IQS), at Barcelona. He has worked in the food industry during all his career, mainly in the fruit transformation business but also in the oil and gourmet industries. He has been leading the research projects of Indulleida for the last years, including development of whole new lines that are coming both from research and product development, such as natural FTNF aromas, modified fibers, fruit flakes, etc. He is also undergoing PhD studies on food science and technology at University of Lleida, which he profits to merge the worlds of academy and industry to gain a better view of product development.
